Welcome to the “Transforming Vaccination Regionally & Globally” Programme

Transforming Vaccination Regionally and Globally is the first FIP Transformation outcome-based online programme of its kind underpinned by the FIP Development Goals (FIP DGs).

Final outcome of the programme is a historic global FIP Commitment to Action on Vaccination in Pharmacy.

A FIP Transforming Vaccination Collection (2021).

FIP DIGITAL PROGRAMME

TRANSFORMING VACCINATION

GLOBALLY & REGIONALLY

ROADMAP
SEPTEMBER
TO DECEMBER
2020

SERIES #1

Identifying transformation needs

The needs of the pharmaceutical science, practice and workforce of vaccination

SERIES #2

Setting transformative goals

Deconstructing vaccination in pharmacy through the FIP Development Goals (FIP DGs) across the entire profession

SERIES #3

Committing to transformation

Delivering a global commitment to action on vaccination

#1

SEPT / OCT

Main outcome

Identification of needs & considerations for transforming vaccination globally across practice, science and workforce & education.

#2

OCT / NOV

Main outcome

Discussing mechanisms and drivers to progress the most relevant FIP Development Goals (FIP DGs) in the context of transforming vaccination in pharmacy.

#3

DEC

Main outcome

Delivering a global FIP Commitment to Action on Vaccination in Pharmacy.

transformingvaccination.fip.org

Engage with us and help us answer the following questions:

1. What single factor should be prioritized to transform pharmacy vaccination services globally and regionally?
2. What would be the most important achievement in terms of pharmacy vaccination services in your country in the next five years?
3. What else should the FIP Commitment to action outline?

Themes and topics covered

3.1 Regional needs and drivers for transforming vaccination: Europe

- Flu vaccinations in pharmacies by pharmacists
- Contributions of full-service healthcare distributors to safe and efficient delivery of vaccines to European citizens
- Empowering pharmacists to transform vaccination – examples of Malta, Belgium, Turkey and other European countries which have initiated or are in the process of initiating immunization in community pharmacies by pharmacists
- WHO Immunization Agenda 2030
- The role of education for transforming vaccination (video message)

5 primary take-away messages from event

FIP DIGITAL PROGRAMME

TRANSFORMING
VACCINATION

GLOBALLY & REGIONALLY

- 1) Pharmacists are important actors in making vaccines and vaccine information available to the public
 - 2) Developing vaccination qualifications to make pharmacists competent to administer vaccines is a key factor for transforming vaccination
 - 3) Best practice sharing can help with bringing about change at national level
 - 4) Advocating about the advantages that diversifying the provision of immunization services through the involvement of pharmacists can add is an important tool for bringing about change
 - 5) Collaboration is an enabler that should be utilised
-

ADVANCING
PHARMACY
WORLDWIDE

Regional needs and priorities identified to transform vaccination

FIP DIGITAL PROGRAMME

TRANSFORMING
VACCINATION

GLOBALLY & REGIONALLY

- Using lessons learned from countries that achieved a transformation of their pharmacy services can help to drive forward change also in other regions
- Fostering (undergraduate) education on vaccination across the entire European region
- Supporting the entire European region in the adoption of new vaccination models

ADVANCING
PHARMACY
WORLDWIDE

Challenges experienced in transforming vaccination for pharmacists

- Turning pilot programmes into nationally applied vaccination services
- Regulatory obstacles that hamper policy change at national level (example of Belgium)
- Receiving the support needed to drive forward changes at national level

Lessons learnt whilst transforming vaccination for pharmacists.

- Pilot projects are a great opportunity to showcase the added value of involving pharmacists in the provision of vaccination services
- Expanding vaccination services can improve uptake (example – increase in flu vaccine delivery)

Key vaccination-related legislative enablers and barriers emerging in the region

- Legislative changes are very much dependent on national factors, however linking success stories from other countries to the national context can help with bringing about change.
- Patience and persistence are important since legislative change may take some time to be implemented.
- Changes in government could both be a barrier and an enabler.

GLOBALLY & REGIONALLY

- Transforming Vaccination Globally & Regionally – Eastern European perspective & experience
- Delivery of a vaccination service faces unique barriers in many countries, but issues with legislation, logistics, and resistance from other health professionals are common issues across the region

Sponsored by

ADVANCING
PHARMACY
WORLDWIDE

Eastern Mediterranean region: Primary take-away messages from event

Successful approach to introducing pharmacist vaccination in countries where it is legal in the Eastern Mediterranean include:

1. Lobbying decision makers & legislators, including the involvement of international organisations to support the position of local pharmacist organisations.
2. Creation of guidelines for vaccination by pharmacists, framework for pharmacists' role within the health system, and accredited training at the same time as point 1, so that pharmacists are *qualified* and ready to contribute the moment that legislation catches up.

FIP DIGITAL PROGRAMME

TRANSFORMING
VACCINATION

GLOBALLY & REGIONALLY

Sponsored by

ADVANCING
PHARMACY
WORLDWIDE

Eastern Mediterranean region: Primary take-away messages from event (cont'd)

3. Inclusion of international organisations – WHO, UNICEF, and FIP – in the process of lobbying decision makers & development of training was a consistent theme.
4. Addressing opposition from others within the healthcare sector is an important part of removing barriers
5. Addressing vaccine hesitancy is an important aspect of improving vaccine uptake for all people.

FIP DIGITAL PROGRAMME

Eastern Mediterranean region: Regional needs and priorities identified to transform vaccination.

- Ensure undergraduate course includes vaccination training.
- Provide post-graduate training for vaccination
- Development of guidelines & framework for vaccine delivery (ie setting in pharmacy, re-accreditation, logistics, cold chain)
- Lobbying of decision makers is a critical activity, and should be accompanied with development of training, guidelines, and framework of vaccine delivery, to ensure that decision makers can see the evidence of pharmacists being qualified to deliver vaccination.
- International organizations – such as WHO, UNICEF, FIP – provide significant support to the lobbying role of local organizations.

FIP DIGITAL PROGRAMME

Western Pacific region: Themes and topics covered

FIP DIGITAL PROGRAMME
**TRANSFORMING
VACCINATION**
GLOBALLY & REGIONALLY

- Efforts undertaken to initiate vaccination by pharmacists, training of pharmacists, interprofessional and public acceptance, once initiated a staged roll-out and expansion of the program should be implemented.

Sponsored by

ADVANCING
PHARMACY
WORLDWIDE

Western Pacific region: Primary take-away messages from event

1. **Advocacy:** Support from regional and global agencies is helpful in convincing domestic stakeholders.
2. **Training and certification:** Pharmacists have significant relevant knowledge which means additional training to satisfy credentialing as a vaccinator is not excessive.
3. **Legislative issues.** This is the impediment that has greatest variability across the Region with each country a unique situation.

FIP DIGITAL PROGRAMME
**TRANSFORMING
VACCINATION**
GLOBALLY & REGIONALLY

Sponsored by

ADVANCING
PHARMACY
WORLDWIDE

Western Pacific region: Primary take-away messages from event (cont'd)

4. Step wise roll out. Once vaccination by pharmacists is approved and initiated, a staged increase in the range of vaccines and the age range of recipients should be applied.

5. Public and healthcare professionals' acceptance: Data that shows pharmacist vaccination leads to an increase in the percentage of the population vaccinated can be used to counter the medical profession's argument that pharmacists are encroaching on their role.

African region: Five primary take-away messages from event

FIP DIGITAL PROGRAMME

TRANSFORMING
VACCINATION

GLOBALLY & REGIONALLY

- 1) Vaccination by Pharmacists is permitted in Kenya, but not permitted in Cameroon nor in Ghana. It is not officially permitted in Algeria though practiced by some community pharmacists
 - 2) Importance of advocating politicians, other healthcare professionals and stakeholders on Pharmacists as an accountable asset in vaccination coverage
 - 3) Importance of an « ad hoc » education to empower Pharmacists
 - 4) Vaccination training should be included in the pre graduated pharmacy curriculum
 - 5) Vaccination by Pharmacists must be legislatively recognized and financially compensated to be sustainable.
-

ADVANCING
PHARMACY
WORLDWIDE

African region: Regional needs and priorities identified to transform vaccination

FIP DIGITAL PROGRAMME
**TRANSFORMING
VACCINATION**
GLOBALLY & REGIONALLY

Advocacy:

- Advocate regulatory stakeholders and politicians on the asset which Pharmacists represent to increase the vaccination coverage and on the absence of regulation for Pharmacists to do so.
- Advocate the other healthcare professionals to raise awareness and establish a trustful collaboration
- Advocate Pharmacists and give them trust and confidence to encourage them for vaccination

Education

- Organize practical hands on workshops on vaccination (learned societies, pharmacy schools/ university, FIP and other international organisations...)
- Vaccination training should be integrated to pre graduate pharmacy curriculum in the future

Finances

- The vaccination training must be budgeted
- Means need to be provided to ensure vaccines adequate transportation and storage
- The vaccination act must be financially compensated

African region: Challenges experienced in transforming vaccination for pharmacists in the African region

FIP DIGITAL PROGRAMME
**TRANSFORMING
VACCINATION**
GLOBALLY & REGIONALLY

Challenge with the other healthcare professionals:

Vaccination may be seen as within the purview of other healthcare professionals: perception of attempts to take over by pharmacists

Challenge with pharmacists:

Reluctance among some pharmacists (difficulties and acquiring new skills or reviving old ones, added responsibility for immunization, backfiring from possible ADRs, misunderstanding of legal provisions...)

Logistic challenge:

Respect of cold chain is a major challenge

Financial Challenges:

No budget for vaccination training for Pharmacists
No budget for the vaccination act to be compensated

Americas region: Themes and topics covered

- **Argentina case:** pharmacist is participating in national vaccination programs of influenza and pneumococcal since last 15 years
 - requirements
 - community pharmacy as an educational and service center
 - participation of the national organization in a consultant group in the MOH
- Barriers that needed to be addressed to participate of immunization programs
- The added value for the population, for the health system and for the pharmacist

Americas region: Five primary take-away messages from event

- 1) The contribution to improve the vaccination rates of non-obligatory vaccines where immunization services were introduced at pharmacy level.
 - 2) Pharmacist must be in the pharmacy, with suitable training (both at pre-graduate or continuous education level)
 - 3) Several countries introduced the importance of moving forward to enable immunization services in community pharmacies
 - 4) A legislative framework, training opportunities and technical requirements should be in place
 - 5) To learn from international experiences, and how these could be transferred to local needs.
-

Americas region: Regional needs and priorities identified to transform vaccination

- 1) COVID-19 altered regular/national vaccination plans because of budget restrictions or other priorities. There are needs to fulfil the gap that has been generated.
- 2) In some cases, vaccination rates are needed to be improved.
- 3) Pharmacists wish to participate of immunization programs in community pharmacist in several countries.
- 4) Each country has a different context and perspective.

Americas region: Challenges experienced in transforming vaccination for pharmacists

- 1) Pharmacist need to be trained.
 - 2) Pre-graduate and postgraduate changes in education should be introduced to generate the pharmacist competence to deliver immunization services.
 - 3) National regulation should be changed in order to recognise the possibility of delivering immunization services at the community pharmacy
 - 4) It still exists an important percentage of the population in the Americas who has not suitable information about immunization programs and their advantages.
 - 5) The MOH and Deans of Pharmacy schools should be engaged in this process

FIP Regulators' Forum

- Develop work began in 2017-18. First meeting occurring in 2019, and the approval of Chair and Working Group.
 - Survey of FIP Members and Regulators from around the world to determine value, scope and items of common interest.
 - Terms of reference of Regulators' Forum approved in September 2020, and include:
 - Mission: To provide a global platform for pharmacy professional regulators, for sharing best practices among peers, emerging trends and needs for the profession and associated regulations, thus contributing to protecting the public and achieving optimal health outcomes through a competent and adequately regulated pharmacy profession.
-

FIP Regulators' Forum

Objectives (excerpt):

- To share good practice around public protection and the roles of regulators therein.
 - To support the advancement of pharmacy regulation worldwide in a coordinated and collaborative manner.
 - To offer a forum for FIP members with regulatory roles and a place for organisations with regulatory roles to engage, share and advise.
 - Advise the FIP leadership and HQ team on key issues related to pharmacy and interprofessional regulation, and particularly in relation to FIP's collaboration with World Health Professions Alliance (WHPA) partners, including the interprofessional conferences on professional regulation organised by WHPA.
-

Regulators' Forum

Possible Forum information activities identified thus far are:

- Access to pharmacist/pharmacy care in remote and under-serviced areas.
- Technology to enable telehealth; delivery of care and services, definition and standards of care
- practice of pharmacy during COVID pandemic and the regulatory environment
- Professionalism and Ethics in undergraduate programs and postgraduate assessments
- Evolving pharmacy inspections from policing to education
- Positive Practice Environment Program
- Drug Importation

Transforming Vaccination – Globally and Regionally

- FIP survey results in 2020 reported:
 - Pharmacy Based Vaccination (PBV) available in 36 countries, 16 more than 2016;
 - Vaccine administration by pharmacists is authorised in 26 countries and territories, compared with 13 in 2016. However, 66 countries and territories in the sample do not have PBV.
 - Pharmacists ability to prescribe vaccines (and other drugs) is very limited in 34 of responding countries;
 - Limited or no access by pharmacists to national vaccination records or ability to document in national vaccination records.

Self Assessment Tool for Preparedness of Pharmacy Based Vaccinations

- The Self Assessment Tool will provide FIP members, member countries and self-identified regulators an evaluation of preparedness, risk and priorities regarding a pharmacy based programme to enhance vaccination, testing and treatment during a pandemic (pharmacy based vaccinations).
- The tool will cover four main areas:
 - Vaccination by pharmacist and pharmacy staff
 - Administer tests (ex. performing nasal swabs)
 - Prescribing of vaccines, other chronic medications and minor treatments
 - Supply Chain Management

.....coming soon!

Letter to Ministers of Health - Pharmacists' role in vaccination against COVID-19

FIP developed a template letter for ministries of health that makes the case for engaging pharmacists and pharmacies in vaccination strategies.

The letter is available in seven languages (Arabic, Chinese, English, French, Portuguese, Russian and Spanish).

Please contact the FIP Headquarters (gspinto@fip.org) for more information.

One-minute survey

FIP DIGITAL PROGRAMME
TRANSFORMING
VACCINATION
GLOBALLY & REGIONALLY

1. Will community pharmacies/pharmacists in your country be involved in vaccinating against COVID-19?
2. Will community pharmacies/pharmacists in your country be involved (or are involved) in performing COVID-19 tests?
3. If yes, what types of tests?

If YES for any of the questions above, **please share a URL or send any documents by email to gspinto@fip.org with the details** of how this will be (or is being) done: whether a medical prescription is required, what are the technical requirements for the service, if and how test results will be communicated to health authorities, supply chain issues, remuneration for the service, etc.)
