Summit Chairs

Luís Lourenço
CEO – Central Pharma Group (CPG)
Professional Secretary – FIP

Lina Bader
FIP Lead for Workforce
Transformation & Development
Today’s aims

*What we’re doing today*

I. Recap the primary outcomes of the Transforming Vaccination Programme

II. Launch and adopt the FIP Commitment to Action on Sustainable and Equitable Access to Vaccines Through Pharmacy

III. Discuss regional priorities and needs with pharmacy leaders from the world’s six regions

IV. Hear from global leaders from health and pharmacy on how we can reduce inequities and widen access to vaccination

V. Carve the pathway to implementing the Commitment and integrating pharmacy-based vaccination within life-course immunization
Vision

A world where everyone benefits from access to safe and effective medicines and pharmaceutical care
Mission

Improve global health by supporting the advancement of pharmaceutical practice, sciences and education.
May 2019: First Memorandum of Understanding between FIP and WHO to strengthen partnership around workforce, patient safety, primary health care and other areas
“One FIP” goals

We can have no pharmaceutical care without a pharmaceutical workforce, and we can have no pharmaceutical care without a scientific foundation for the next decade.
FIP LEADERSHIP SUMMIT
Pharmacy-based Vaccination Policy and Advocacy

18 November 2021  14:00 – 16:00 CET

https://transformingvaccination.fip.org/2021-summit
Pharmacy-based vaccination and vaccine-related services are linked to 17 of the 21 FIP Development Goals, with a central role in seven of them.
Poll 1: Do pharmacists provide vaccination services in your country?
A GLOBAL HEALTH PERSPECTIVE:
HOW CAN PHARMACY REDUCE INEQUITIES AND WIDEN ACCESS TO VACCINATION?
Equity in the time of COVID-19

FIP STATEMENT OF PRINCIPLE: Impact of the COVID-19 pandemic on health equity, and vulnerable patients and populations

25 May 2020

Addressing health inequalities and inequities is more urgent than ever as the world faces the deadly COVID-19 pandemic.

FIP recognises that the impact of COVID-19 is closely linked to social determinants and will lead to increased vulnerability across communities, especially where there are underlying and existing problems.

Poor access to healthcare and basic services are factors that will increase vulnerabilities. Other factors include weak systems (health, social, governance), high dependence on informal economies, armed conflict and violence, and marginalised and underrepresented communities.

The FIP Equity programme provides a roadmap for a set of concerted actions towards equity in pharmacy and health. The programme emphasises the contribution of pharmacy towards a better and more inclusive civil society for all and the FIP Commitment to Equity, to be launched later this year, commits to these principles.

Recognising and identifying the patients and populations most vulnerable to COVID-19 is critical and urgent. It requires particular and additional protective strategies from governments and other stakeholders. Pharmacy can play an important role in addressing and addressing these inequalities, and in ensuring vulnerable patients and populations during this pandemic.

FIP STATEMENT OF PRINCIPLE: Accelerating vaccine equity for pharmacy teams on the front line

22 March 2021

Supporting access for health workers and pharmacy teams

The International Pharmaceutical Federation (FIP) supports the World Health Organization’s (WHO) Access to COVID-19 Tools Accelerator, which calls on global, regional, and local leaders to accelerate equitable access to vaccines in every country, ensuring all health workers and those at highest risk from COVID-19. FIP also supports the World Health Assembly’s voluntary instrument for COVID-19.

The World Health Assembly 2021 will have a special focus on the health workforce and how to support access to vaccines and treatments for all. FIP will make a statement on the role and responsibilities of the pharmacy profession in supporting health workers and the health system.

Vaccine access for pharmacy teams contributes to vaccine equity for all FIP recognises the critical role that pharmacy teams can play in ensuring patients and populations and contributing to increasing vaccination coverage in multiple ways, including education, counselling and education. The provision of vaccination services through pharmacies can facilitate access to vaccines for everyone, especially in rural and underserved populations and those in the utmost need.
THE FIP COMMITMENT TO ACTION ON IMPROVING
VACCINATION COVERAGE THROUGH PHARMACIES 2020

transformingvaccination.fip.org/commitment/
Launched in December 2020 during the first FIP Virtual Global Summit on transforming vaccination in pharmacy

Describes 17 actions which include the following objectives:

- To address vaccines hesitancy;
- To strive towards equity of access to vaccinations, with particular focus on expanding vaccination pathways for adults;
- To advocate legislative frameworks that provide the regulatory assurance of pharmacist-delivered vaccination services and appropriate funding models; and
- To ensure health system readiness for mass immunisation against current and future pandemics
Speaker

Bettina Borisch

We are a global society

Without a global cohesion of states, civil society and corporates we will not be able to tackle the “syndemics”

We are all in it together!
Divisive Forces Globally
Multilateralism under Pressure
Values: a political choice

• Basis of equal, healthy societies: **Solidarity**

• The concept of solidarity is based on the idea that people can unite across their differences because they have a common interest in not allowing themselves to be divided and conquered.

• Solidarity has to be learned and transmitted.
The Case of Vaccination and Equity

- The reaction of “me first”
- The solidarity actions
- The results

Political context and action
Thank you for your attention with a little bit of snow from Monte Rosa / Zermatt / Switzerland
• How can we form intra and inter-professional alliances to transform vaccination polices and achieve equity?
• What are some of the enablers or barriers in health policies that help reduce vaccination inequities, especially with regards to governments, policymakers, and other agencies working together?
• How can pharmacy (the profession) or pharmacists contribute to the agenda at an institutional, regional, or national level?
• What is the single most important policy change that can take place today to reduce vaccination inequity?
LOOKING BACK AT
“TRANSFORMING VACCINATION REGIONALLY AND GLOBALLY 2020”
FIP Transforming Vaccination Regionally & Globally 2020

Recapping key outcomes

• The 1st FIP digital transformation outcome-based online programme

• Underpinned by the FIP Development Goals (FIP DGs)

• Resulted in:
  o Global FIP Commitment to Action on Vaccination in Pharmacies
  o FIP Transforming Vaccination Collection

Resource Webpage

Poll 2: Did you participate in any of the 2020 transforming vaccination programme events?
“TRANSFORMING VACCINATION GLOBALLY, REGIONALLY AND NATIONALLY 2021”
Equity, Sustainability and Action
Transforming Vaccination Timeline

- **September 2020**: Launch of TV 2020 Programme, which consists of 3 series.
- **December 2020**: Commitment To Action On Improving Vaccination Coverage Through Pharmacies
- **February 2021**: Launch Of Transforming Vaccination Collection 2020
- **June 2021**: Launch Of TV 2021 Programme, which consists of 2 series.
- **Today**: Commitment To Action On Accelerating Vaccination Equity, Access And Sustainability Through Pharmacy
- **February 2022**: Transforming Vaccination Globally & Regionally Collection 2021
Transforming Vaccination 2021

12 events over 2 series

- Series 1: Towards equity in vaccinations globally
- Series 2: Sustainability in vaccinations regionally and nationally
Transforming Vaccination 2021: Series 1 Towards equity in vaccinations globally

The first of the two series comprises 5 episodes which include an opening event alongside 4 other events which explore equity in vaccinations across the different angles of

age,
gender,
literacy & education,
and collaboration & working together.
The second of the two series in 2021 comprises 7 digital events, including 6 regional roundtables which will discuss and identify priorities for sustainable access to vaccinations through pharmacies around the world.

The programme ends with today’s Leadership Summit in which we present a Commitment to Action on Sustainable and Equitable Access to Vaccines Through Pharmacies.
Transforming Vaccination 2021: Key Outcomes

1) 12 digital events including 6 regional roundtables and a Leadership Summit

2) FIP Global Commitment to accelerate equity, access and sustainability of vaccinations

3) Special Policy Collection
“TRANSFORMING VACCINATION GLOBALLY, REGIONALLY AND NATIONALLY 2021”

RECAPPING SERIES 1 (EPISODES 1-5)
Nour ElTahla

Programme Coordinator –
Transforming Vaccination Globally, Regionally & Nationally 2021 (external-facing activities)
EPISODE 1
Introducing the FIP ‘Transforming Vaccination Globally, Regionally and Nationally’
2021: Accelerating equity, access and sustainability through policy development and implementation

SERIES 1
“Towards equity in vaccinations globally”

Date 17 June Time 13:00-14:00 CEST

Moderator
Lina Bader
(Saudi Arabia)

Co-Moderator
Farah Aqqad
(Jordan)

Panellist
Catherine Duggan
(The Netherlands)

Panellist
Gonçalo Sousa Pinto
(Spain)

Panellist
G. Sumalatha
(India)

Panellist
Prosper Hiag
(Cameroon)

Panellist
John Jackson
(Australia)

Panellist
Nadia Al Mazrouei
(UAE)
EPISODE 2
Equity, access & sustainability through life’s ages and stages:
Enabling a life course-approach to vaccination

SERIES 1
“Towards equity in vaccinations globally”

Date 8 July  Time 13:00-14:00 CEST

Interviewer
Lina Bader
FIP Lead for Workforce Transformation and Development

Interviewee
Jane Barratt
Secretary-General, International Federation on Ageing

Sponsored by Pfizer
Recapping with our guests

EPISODE 3
Vaccinations and the genders: Examining inequities in gender access and handling of vaccinations globally to inform pharmacy policy

SERIES 1
“Towards equity in vaccinations globally”

Date 10 August Time 14:00-15:30 CEST

Moderator
Carlene McMaugh
Medical Sales
Cipla Pharmaceuticals

Co-Moderator
Nadia Bukhari
Associate Professor
University College London

Panellist
Sofía Segura
Professor, University of Costa Rica and College of Pharmacists of Costa Rica

Panellist
Erica N. Rosser
Research Associate, The Johns Hopkins Bloomberg School of Public Health

Panellist
Samiratou Ouedraogo
Co-founder and Chair
Women in Global Health Francophone West
EPISODE 4
Health illiteracy and vaccine misinformation as determinants for equity: developing policies to establish access to quality information in an equitable way

SERIES 1
"Towards equity in vaccinations globally"

Date 26 August   Time 13:00-14:30 CEST

Moderator
Timothy F Chen
Head of Pharmacy Practice and Health Services Research, University of Sydney, Australia

Panellist
Mujahidhussein G Valji
Chief Pharmacist, Aga Khan Health Services, Tanzania

Panellist
Fiona Stanaway
Senior Lecturer in Clinical Epidemiology, University of Health, Australia

Panellist
Hannelie Meyer
Professor in the School of Pharmacy, SMU Head of SAVIC, South Africa

Panellist
Régis Vaillancourt
FIP Foundation Director, Pharmacy Consultant, Canada

Sponsored by
Pfizer
EPISODE 5
Working together across systems to transform vaccination policy: working with others in our professions, with other disciplines and agencies to establish sustainable policies

SERIES 1
“Towards equity in vaccinations globally”

Date 23 September  Time 14:00-15:30 CEST

Moderator
Lina Bader
Lead for Workforce Transformation & Development
International Pharmaceutical Federation (FIP), Saudi Arabia

Co-Moderator
Eduardo Savio
President, Pharmaceutical Forum of the Americas, Uruguay

Panellist
Suresh Bhojraj
Pro Chancellor, IIS Academy of Higher Education and Research, Mysuru, Karnataka, India

Panellist
Daphné Holt
Chair, Coalition for Life-course Immunisation (CLCI), France

Panellist
Katarina Milosevic Kostadinovic
Chairman, Assembly of Pharmaceutical Chamber of Montenegro, Montenegro

Panellist
Marleen Haems
Director of Professional Management, KOVAG / VAN, Belgium

Panellist
Meghna Joshi-von Heyden
Strategic Development Advisor, Commonwealth Pharmaceutical Association (CPA), Switzerland

Pharmaceutical services in immunization: Contributions, experiences, and implementation in the Americas region

Technical document
2023
Barriers to achieving vaccine equity

- On a global level, nationalism hinders multilateral efforts
- Weak country health and immunization infrastructure and systems
- Vaccine manufacturing, a for-profit business
- Lack of vaccine manufacturing facilities and resources in each country/region
- Reaching zero dose children
- Misinformation around vaccines
Lessons emerging from the region with regard to widening access to vaccination

Authority to Vaccinate – overcome state authority restrictions
- COVID-19 vaccine
- Childhood, adolescent and adult vaccinations

Reimbursement for Pharmacist Services
- For administering all ACIP recommended vaccines
- Equity with other providers and adequate levels in payment from public and private payers

Pharmacists as Front-Line Providers
- Adequate PPE
- Workplace conditions and protections; Adequate staffing support
- Clarity and consistency in policies, procedures, and communications

Pharmacies as Essential Vaccine Access Points and Trusted Immunization Providers
- Distribution
- Vaccine-confidence
- Information
• Vaccine storage, handling, and administration
• Changing information and recommendations
• Vaccine trust and misinformation
• Medication shortages
• No Medicare payment mechanism for pharmacist-provided services in medically underserved areas
• Reaching rural and medically underserved communities
What have been the situation with COVID-19 vaccination in Latin America?

 Transforming Vaccination
Globally, Regionally & Nationally

FIP Digital Programme 2021

FIP
ADVANCING PHARMACY WORLDWIDE

Pfizer

FIP Digital Events
What do we need?

- To support pharmacist training in those countries where immunisation services have not been implemented.
- To support in advocacy where pharmacists are still not considered to perform vaccination.
- To strengthen pharmacovigilance systems to improve surveillance.
- There are still opportunities to improve distribution.
- Only four countries participate in vaccine development.
Carlos Lacava
Vice President - FIP Member of Uruguayan Association of Chemistry and Pharmacy
Transforming Vaccination Globally, Regionally and Nationally

Transforming Vaccination Globally, Regionally and Nationally

Accelerating Equity, Access and Sustainability Through Policy Development and Implementation

Sustainable and equitable access to vaccines: Establishing priorities and setting policies in the Americas region.

Speakers:

• Magaly Rodriguez de Bittner (USA)
• Mariela Méndez Ferreira (Uruguay)
• Sofía Segura (Costa Rica)
• César Moreno Romero (Colombia)
Key Conclusions

• Despite there are no uniformity among the region, the vaccination coverage is quite high.
• Not all countries have the same compulsory vaccines.
• The participation of pharmacists is different among the region.
• The importance of vaccines in public health is recognized in the whole region.
Thank you

Europe

Ema Paulino
President - Portuguese National Association of Pharmacies
FIP Immediate Past Professional Secretary
South East Asia

Sherly Meilianti
FIP Data and Intelligence Specialist
What went well within the South East Asia

- Our lesson learnt -

01 Inclusion in the Law
02 Local vaccine production
03 Vaccines free to all
04 Use of technology in vaccine distribution
05 Rapid responses, collaboration and coordination
What obstacles found in the South East Asia

- Our challenges -

1. Uniqueness of geographical and demographical challenges
2. Capacity in vaccine production
3. Lack of infrastructure
4. Limited human resources for health – opportunities for pharmacists
5. Public acceptance – vaccine hesitancy
6. Improvement of health information system
Key changes to achieve equity in vaccination within the South East Asia

- Our needs and priorities -

1. Collaboration and coordination
2. Competency development for pharmacy workforce
3. Expansion of pharmacy workforce role to be vaccinators
4. Data intelligence and sharing knowledge

Accelerating equity, access and sustainability through policy development and implementation

Three aspects

• Equity in vaccinations across age, gender, literacy & education.
• Interprofessional unity & collaboration.
• Regional priorities.

Key factors:

• Opportunity for pharmacy-based immunisation services
• Need for life-course vaccination – more than childhood schedules
Equity in vaccinations across age, gender, literacy & education

Outcome

• Pharmacy policy and practice development to recognise and address inequities in access to vaccines

Issues

• Health literacy and vaccine hesitancy impact vaccine uptake.
• Integrating pharmacy-based vaccination into wider national vaccination policies can impact vaccination and disease prevention across the life-course.
Interprofessional unity & collaboration

Outcome
• Interprofessional collaboration to be engaged in striving to achieve equitable, enhanced and sustained access.

Issues
• Pharmacists as part of a multi-disciplinary workforce delivering vaccination programs.
• Pharmacy-based immunisation services augment services by other professionals.
Regional priorities

Outcome
• Regional opportunities to accelerate needs-based policy development and implementation relating to advocacy and guidelines for vaccine equity, access and sustainability.

Issue
• What are the needs, priorities and challenges of each Region?
• Nations benefit from policies that allow sharing of data, technology and workforce to enhance vaccination.
Prosper Hiag
President - African Pharmaceutical Forum (APF)
Eastern Mediterranean

FIP Lead for Workforce Transformation & Development
LAUNCH OF FIP COMMITMENT TO ACTION ON ACCELERATING VACCINATION EQUITY, ACCESS AND SUSTAINABILITY THROUGH PHARMACY
Global and regional applicability

1. Supporting countries with accelerating policy development, implementation and transformation, through advocacy, guidelines and support.

2. Identifying the needs, priorities and challenges of every region through needs-based policy development.
FIP Commits To Transforming Vaccination By Accelerating Vaccine Equity, Access And Sustainability

*Life-course immunisation*

3. Recognising the impact of pharmacy-based vaccination delivery on disease prevention throughout life’s ages and stages from childhood (including pregnancy) to late adulthood.

4. Supporting countries to develop policies that enable pharmacies and pharmacists to deliver integrated vaccination services throughout the life-course and as part of wider national immunisation policies.
FIP Commits To Transforming Vaccination By Accelerating Vaccine Equity, Access And Sustainability

Gender

5. Recognising the multi-faceted impact of gender on vaccination access, delivery and policy, and the inequities in gender access to vaccines to inform pharmacy policy.

6. Supporting countries to develop policies that accelerate equitable access of vaccinations to all genders, empower women as caregivers to support vaccinations, mitigate the impact of COVID-19 on gender inequity, and address the issues around gender inequity in the workforce (which is especially important to discuss in 2021 Year of the Health Worker).
7. Recognising the impact of health literacy and vaccine hesitancy on vaccine uptake and sustainable access, disease prevention, and the overall health of the population and integrating it in policy setting.

8. Supporting countries to develop policies that empower pharmacists to address health literacy and reduce vaccine hesitancy, misinformation and disinformation in all parts of society by building trust through effective communication and easy access of correct and accurate information to patients and the public.
FIP Commits To Transforming Vaccination By Accelerating Vaccine Equity, Access And Sustainability

**Working Together**

9. Recognising and fully harnessing the power of interprofessional collaboration as a driver to achieving equity, accessibility and sustainability in vaccination.

10. Supporting countries to develop policies that allow for the sharing of data and technology around vaccination as well as utilising a multidisciplinary workforce to make vaccinations equitable, accessible and sustainable.
